Welcome, to ChiroPulse... the Beat of the Future!®. You are about to enter a new era of office and clinical health care management. ChiroPulse365 (ChiroPulse version 5) is designed by Chiropractors for use by Chiropractors, supporting the office and patient work flow faced by all of our offices. This software is an advanced tool to help you complete your work quickly & serve as your practice's "Chiropractic Brain"®

Join our 10th Anniversary celebration!

CMS HCFA 1500 with NPI... We're Ready!

We update ChiroPulse with requirements to stay current. A fully compliant ChiroPulse update for HCFA 2007 with NPI was released March, 2007.

Windows Vista Compatible!

ChiroPulse365 is 100% compatible with Windows Vista as both a network client and/or a database server.

Our Story... About Pulse Software

Pulse Software, LLC was established in 1995 and released it's initial software offering (ChiroPulse v1) on the IBM OS/2 platform in spring 1997 and Windows platform summer 1998. The Members and employees of Pulse Software, LLC are committed to the vision of linked prosperity. The company mission consists of three (3) interrelated components:

Product Mission - To produce and deliver the highest quality products and services to our customers, embracing creativity, innovation and advances in information technology.

Social Mission - To stem the increase in Chiropractic care expense, and expand the utilization of Chiropractic services. To dramatically improve the integrity and integration of the Chiropractic profession into all health care delivery systems, and, to promote and advance the Chiropractic profession well into the 21st century.

Economic Mission - To operate the company on sound financial principles, striving for continuous profitable growth, and seeking to provide a fun environment where our Members and our employees are financially rewarded for their efforts.

Pulse Software Company Highlights

- » We are a progressive, integrated software solutions provider.
- » IBM Business Partner, offering complete hardware solutions to customers.
- » Microsoft Developer Network member provides us with the latest products, tools & support.
- » Registered member of IBM's prestigious Solutions Developer Program & IBM Business Partner.

ChiroPulse365 Computer Requirements

Equipment	Recommended
Windows	Windows XP or Vista (for client workstation or data server)
Computer	Intel Pentium-4 2.2 GHz or faster recommended - Dual core CPU preferred.
Memory	XP: 1GB RAM (512 is inadequate but temporarily workable). Vista requires 1GB RAM (2GB highly recommended)
Peripherals	Keyboard, Mouse & CD-ROM drive. Flash or Hard disk backup device 1024x728 XGA or higher resolution Fast Ethernet 100Mbps (TX-100) card & switch (networks) or faster (TX-1000 Gigabit)
Disk space	1GB free (100 mb for Pulse files, extra room for temporary files)
Internet Access	Onsite Internet connection is required to activate/register your software, purchase updates and obtain support tickets. Broadband internet highly recommended (cable, DSL, Fios, no dialup modems)
E-mailAccess	Onsite E-mail access is required for ChiroPulse license, support & other notices.

Computer Network Solution Guidelines

Computers are part of a rapidly changing technology environment where offices commonly struggle to define their actual PC needs. These guidelines should help you get the right equipment for your office at the right price for today and the future. Not too much and not too little.

Complete PC/Server Equipment	Description	Cost Est.
Computer System ¹	64-bit AMD x2 Dual Core or Intel CoreDuo (or better) with 1GB RAM, 40GB HDD (hard disc drive), DVD/CD-RW, Etherfast Network card, keyboard with one year parts/labor warranty.	\$575
Windows XP or Vista ²	Windows XP or Vista pre installed on computer	---
Memory Upgrade (if needed)	1GB upgrade (to 1-2GB total)	\$50-75
Backup Device	4GB (or larger) Flash drive (or external hard drive) for server	\$35
Flat Panel Monitor	19" Widescreen LCD Flat panel	\$195
Other Office & Networking Extras		
Laser Printer & cable ³	Personal laser printer to multi-tray duplex (two-sided) printer. USB or "Network" connection	\$300
UPS Battery Backup	Uninterrupted Power Supply (450VA or better) for Data Server	\$75
Wired Router/switch (4+ port)	Fast Ethernet switch with built in wired router to share internet and Network connection. For more than 4 PCs or network devices simply connect an 5-8 port switch to one of the routers network port to create additional ports..	\$50
Cat5e Network cables	One cable for each PC to connect to the Router/Switch	\$15
Antivirus Software	Installed on each computer with auto updates	\$35
Installation by Local Expert ⁴	To setup the network, share your server drive, setup automated backup, share the printer, etc.	\$???

¹ Intel CoreDuo or AMD X2 64-bit dual core processors provides the latest technology for significant CPU speed while conserving power and lowering heat output (less risk of failure). For voice dictation software (Dragon or ViaVoice), please consider the fastest processor within budget and 2GB minimum memory.

² Most business computers such as the Dell, HP and IBM/Lenovo come equipped ready to operate. Windows Remote Desktop (remote PC access from home or network computer) requires full-time internet connection (cable/Fios/DSL) and Windows XP Pro, XP Media Center, Vista Business or Vista Ultimate.

³ Any printer that works with Windows will suffice. Several models are listed which vary in print speed and durability. Ink Jet printers are more costly to operate but have a lower initial price and allow cost effective color printing.

⁴ Having a local computer networking expert install and setup your network is highly recommended. Pulse Software cannot provide support for network setup, printer sharing or other Windows installation Issues. Once your network is running and all computers connected and visible in "Network Places" can we offer support with ChiroPulse
